Report of 18 years old found positive for Corona Virus in Muktsar
The patient is already in quarantine and everything is under control, DC Muktsar
The person found positive is already being quarantined in Muktsar’s mosque
Muktsar, April 8: Report of an 18 years old patient is found positive today in Muktsar who has been identified as Muhammad Sammi, a resident of Meerut. He was suspected of catching Covid-19
and was quarantined along with 14 others in a city mosque for the past one week.
Confirming the unofficial report, Deputy Commissioner M. K. Aravinda Kumar said that since this patient was found suspected and was quarantined within time he failed to get in touch with any other outsider.
“We quarantined 15 persons and report of 14 has already been received as negative. Earlier the report of three was sent again after 48 hours of the first report and report of two of them were negative,” the DC said. Report of this patient was sent to Viral Research and Diagnostic Laboratory, Government Medical College Pathalis.
He pointed out that as per the preliminary investigations the patient was a part of a group of people from Meerut and had been staying temporarily in Muktsar in view of the current pandemic.
He stated that everything is under control and the person found positive is not allowed to mingle with any outsider and will be treated soon. His treatment is already started in isolation facility Covid Care Hospital in Muktsar.
